EDITORIAL

Welcome to the first edition of *The International Comparative Legal Guide to: Data Protection*.

This guide provides the international practitioner and in-house counsel with a comprehensive worldwide legal analysis of the laws and regulations of data protection.

It is divided into two main sections:

One general chapter entitled *Data Protection – a Key Business Risk*.

Country question and answer chapters. These provide a broad overview of common issues in data protection laws and regulations in 29 jurisdictions.

All chapters are written by leading data protection lawyers and industry specialists and we are extremely grateful for their excellent contributions.

Special thanks are reserved for the contributing editor Bridget Treacy of Hunton & Williams for her invaluable assistance.

Global Legal Group hopes that you find this guide practical and interesting.

The *International Comparative Legal Guide* series is also available online at www.iclg.co.uk.

1 Relevant Legislation and Competent Authorities

1.1 What is the principal data protection legislation?

The principle data protection legislation is the Data Protection Act 1998 (the “DPA”), which took effect in 2000 and implements into UK law the requirements of the EU Data Protection Directive (95/46/EC) (the “Data Protection Directive”). The purpose of the DPA is to balance the rights of individuals and the commercial interests of organisations that use personal data about individuals.

1.2 Is there any other general legislation that impacts data protection?

The Privacy and Electronic Communications (EC Directive) Regulations 2003 (as amended by the Privacy and Electronic Communications (EC Directive) (Amendment) Regulations 2011) (“PECR”) implement the requirements of Directive 2002/58/EC (as amended by Directive 2009/136/EC) (the “ePrivacy Directive”). PECR regulates direct marketing by electronic means and the use of cookies and similar technologies. It also imposes sector-specific breach reporting requirements, applicable to providers of public electronic communications services.

1.3 Is there any sector specific legislation that impacts data protection?

Regulated organisations within the financial services sector have a separate obligation to conduct their business activities with “due skill, care and diligence” and to “take reasonable care to organise and control [their] affairs responsibly and effectively, with adequate risk management systems”. These requirements impose additional data protection compliance obligations on data controllers within the financial services sector, in addition to the DPA.

1.4 What is the relevant data protection regulatory authority(ies)?

The Information Commissioner’s Office (the “ICO”) oversees and enforces the DPA and PECR in the UK. The current Information Commissioner, appointed in June 2009, is Christopher Graham. The Information Commissioner is appointed by HM The Queen, has independent status, and reports directly to Parliament.

Data controllers within the financial services sector are also regulated by the Prudential Regulation Authority (the “PRA”) and the Financial Conduct Authority (the “FCA”).

2 Definitions

2.1 Please provide the key definitions used in the relevant legislation:

■ “Personal Data”

“Personal data” means any data which relate to a living individual who can be identified from those data, or from those data and other information which is in the possession of, or is likely to come into the possession of, the data controller.

Under the DPA, “personal data” does not include information relating to persons who are not individuals (e.g., companies or trusts).

■ “Sensitive Personal Data”

“Sensitive personal data” means personal data relating to ethnicity, race, political or religious beliefs, trade union membership, health, sexual life and orientation, or actual or alleged criminal proceedings and convictions. Sensitive personal data are subject to increased compliance obligations due to their sensitive nature and the increased risk of harm to the individual if the data are improperly handled.

■ “Processing”

The DPA governs the collection, use and storage of personal data and applies to both manual and computerised data and all forms of data “processing”. “Processing” means obtaining, recording or holding data, including the organisation, adaptation or alteration, retrieval, consultation or use, disclosure and blocking, destroying or erasure of personal data.

■ “Data Controller”

The DPA defines a “data controller” as a natural or legal person who, alone or jointly, determines the purposes for which, and the manner in which, the personal data are processed. The DPA only applies to data controllers.

■ “Data Processor”

A “data processor” is defined as any natural or legal person (other than an employee of the controller) who processes personal data on behalf of the controller. A data processor does not have any direct statutory obligations under the DPA and is only subject to contractual obligations imposed by the data controller.

■ “Data Subject”

A “data subject” is the individual who is the subject of the personal data.

3 Key Principles

3.1 What are the key principles that apply to the processing of personal data?

■ Transparency

Under Principle 1 of the DPA, personal data must be processed fairly and lawfully. Specifically, data subjects must be informed by the data controller of how their personal data will be used.

As a minimum, at the time of collection of the personal data or before it is first processed by the data controller, the data controller must provide notice of: (i) its identity; (ii) the fact that personal data are collected and the types of personal data collected; (iii) the specific purposes for which the personal data will be processed; and (iv) any further information required to make the processing fair in the particular circumstances, e.g., disclosures of the personal data to third parties or transfers of the personal data outside of the jurisdiction.

Notice should be clear, easily understandable and genuinely informative.

■ Lawful basis for processing

For personal data to be processed lawfully, the data controller must have a legal basis for each processing activity. The DPA sets out legal bases for the processing of personal data in Schedule 2, and for sensitive personal data in Schedule 3.

The legal bases commonly relied upon by UK data controllers to process personal data are: (i) consent of the data subject; (ii) processing that is necessary to perform a contract, or to enter into a contract, with the data subject; (iii) processing that is necessary to comply with a legal obligation of the data controller (other than a contractual obligation); and (iv) processing that is necessary for the legitimate interests of the data controller or a third party to whom the data are disclosed, except where it would prejudice the fundamental rights and freedoms of the data subject (this is a balancing test).

Where processing sensitive personal data, UK data controllers commonly rely on consent or compliance with an employment law obligation.

■ Purpose limitation

Under Principle 2 of the DPA, personal data may only be obtained for one or more specified and lawful purposes, and cannot be further processed in any manner incompatible with that purpose. Determining whether a further purpose is “compatible” with the original purpose is a question of fact. Where a further purpose is deemed incompatible with the original purpose, the data controller must provide notice of the further purpose and be able to rely on a legal ground for the further purpose.

■ Data minimisation

Under Principle 3 of the DPA, personal data must be relevant and not excessive in relation to the purpose for which they are processed. Data controllers are therefore under a duty to process only the personal data necessary for the relevant processing purpose, and to not collect or retain unnecessary or irrelevant personal data.

■ Proportionality

As part of the data minimisation principle, personal data collected and processed should be proportionate to the processing purposes.

In practice, this means processing the least amount of personal data necessary for the purposes, and using anonymous or pseudonymous data where possible.

■ Retention

Under Principle 5 of the DPA, personal data must not be retained for longer than is necessary for the processing purpose. Data controllers must ensure that data are only collected, used and retained to satisfy the relevant processing purpose. The DPA does not, however, stipulate any specific retention periods.

■ Other key principles

The DPA also requires data controllers to ensure that the personal data they process are accurate and up to date (Principle 4 – see Section 4), processed in accordance with the rights of affected data subjects (Principle 6 – see Section 4), safeguarded by appropriate organisational and technical measures (Principle 7 – see Section 13), and not transferred outside of the European Economic Area, unless an adequate level of data protection exists (Principle 8 – see Section 8).

4 Individual Rights

4.1 What are the key rights that individuals have in relation to the processing of their personal data?

■ Access to data

A data subject has the right to submit a subject access request (“SAR”) to a data controller, requiring the data controller to: (i) confirm whether it is processing the data subject’s personal data; (ii) provide a description of their personal data held by the data controller, the purpose for which their data are held, the persons or category of persons to whom their data may be disclosed, and any information about the source of the data; and (iii) provide a copy of their personal data. SARs must be made in writing, and data controllers are permitted to charge a statutory fee (currently £10) towards the costs of responding to the SAR.

■ Correction and deletion

Under the DPA, personal data must be accurate and, where necessary, kept up to date (Principle 4), and must not be retained for longer than is necessary (Principle 5).

A data subject can require a data controller to correct or supplement inaccurate or incomplete personal data held about them. Data subjects can also apply for a court order requiring the data controller to rectify, block, erase or destroy personal data that are inaccurate.

■ Objection to processing

A data subject has the right to object to processing, but only if it causes unwarranted and substantial damage or distress. If it does, the data subject has the right to require an organisation to stop (or not to begin) the processing. The right to object to processing is not an absolute right. In certain limited circumstances, data controllers may be required (including by court order) to stop or not begin processing a data subject’s personal data. If, in the circumstances, the data controller is not required to stop (or not begin) the processing, the data controller must provide an explanation to the data subject as to why it does not have to, and will not, stop the processing.

■ Objection to marketing

Under the DPA, a data subject can object at any time to the processing of their personal data for marketing purposes. This is an absolute right.

■ Complaint to relevant data protection authority(ies)

Individuals may raise complaints with the ICO. The ICO’s website

provides a number of survey-style complaint forms, based on different areas of complaint, currently including nuisance marketing text messages and telephone calls. The ICO encourages individuals to use these standard online complaint forms and reporting tools. Nevertheless, data subjects can also raise complaints in writing, by email, or by telephoning the ICO. There is no charge to submit a complaint.

■ **Other key rights**

Data subjects also have rights in relation to direct marketing and cookies (see Section 7).

5 Registration Formalities and Prior Approval

5.1 In what circumstances is registration or notification required to the relevant data protection regulatory authority(ies)? (E.g., general notification requirement, notification required for specific processing activities.)

Under the DPA, a general registration requirement is imposed on data controllers. Certain exemptions apply, including: (i) for not-for-profit organisations, in certain circumstances; (ii) processing personal data for personal, family, or household affairs (the “domestic purposes exemption”); and (iii) data controllers who only process personal data for purposes of their own business relating to staff administration, advertising, marketing and public relations, and accounts and records.

5.2 On what basis are registrations/notifications made? (E.g., per legal entity, per processing purpose, per data category, per system or database.)

Registrations must be submitted for each legal entity. Each data controller that is under a duty to register must submit a registration which sets out its data processing activities.

5.3 Who must register with/notify the relevant data protection authority(ies)? (E.g., local legal entities, foreign legal entities subject to the relevant data protection legislation, representative or branch offices of foreign legal entities subject to the relevant data protection legislation.)

Organisations subject to the DPA and not benefitting from one of the registration exemptions must register with the ICO. This therefore includes both UK organisations and foreign organisations. The latter can register through a UK branch office or an appointed UK representative.

5.4 What information must be included in the registration/notification? (E.g., details of the notifying entity, affected categories of individuals, affected categories of personal data, processing purposes.)

The following information must be included in the ICO registration: (i) name of the data controller; (ii) legal status of the data controller (e.g., sole trader, company); (iii) address; (iv) sector in which the data controller operates; (v) nature of work; (vi) processing purposes; and (vii) data transfers. There are also a number of tick-box compliance questions to complete and contact details for queries must be provided.

5.5 What are the sanctions for failure to register/notify where required?

Failure to register with the ICO is a criminal offence and may lead to a fine of up to £5,000 in a magistrates court or an unlimited fine in the Crown Court.

5.6 What is the fee per registration (if applicable)?

An initial fee and annual renewal fee apply. Data controllers with over 250 employees and a turnover of £25.9 million or more must pay a notification fee of £500. All other data controllers must pay a £35 fee. Registered charities and small occupational pension schemes are subject to the £35 fee, regardless of their size and turnover.

5.7 How frequently must registrations/notifications be renewed (if applicable)?

Registrations must be renewed annually.

5.8 For what types of processing activities is prior approval required from the data protection regulator?

No processing activities require prior approval from the ICO. However, a data controller may wish to approach the ICO informally before implementing a new processing activity, particularly if it is high risk, novel, or using emergent technology, the compliance of which may be something of a “grey area”.

5.9 Describe the procedure for obtaining prior approval, and the applicable timeframe.

This is not applicable.

6 Appointment of a Data Protection Officer

6.1 Is the appointment of a Data Protection Officer mandatory or optional?

There is no statutory requirement to appoint a Data Protection Officer, however, in practice, many organisations do, particularly larger organisations.

6.2 What are the sanctions for failing to appoint a mandatory Data Protection Officer where required?

This is not applicable.

6.3 What are the advantages of voluntarily appointing a Data Protection Officer (if applicable)?

Voluntarily appointing a Data Protection Officer does not provide statutory exemptions from other obligations. However, it affords obvious practical compliance advantages in terms of specialist knowledge and know-how, a single contact point for data protection queries, and a designated individual with overall responsibility and oversight for data protection matters.

6.4 Please describe any specific qualifications for the Data Protection Officer required by law.

There are no particular qualifications prescribed by law. In practice, Data Protection Officers typically have experience in information management, records management, IT, data security, and/or compliance.

6.5 What are the responsibilities of the Data Protection Officer, as required by law or typical in practice?

There are no responsibilities prescribed by law. In practice, the Data Protection Officer is typically responsible for responding to queries and requests from data subjects, the ICO, the FCA and the PRA; developing internal policies and procedures; developing staff training; advising on compliance with applicable law; reviewing and advising on new products or procedures; identifying risk areas; and advising on legal developments that may impact the organisation.

6.6 Must the appointment of a Data Protection Officer be registered/notified to the relevant data protection authority(ies)?

No. However, a contact person needs to be designated on the ICO registration, and this can be the Data Protection Officer.

7 Marketing and Cookies

7.1 Please describe any legislative restrictions on the sending of marketing communications by post, telephone, e-mail, or SMS text message. (E.g., requirement to obtain prior opt-in consent or to provide a simple and free means of opt-out.)

Postal marketing communications are not specifically regulated, but must generally comply with the requirements of the DPA.

PECR distinguishes between live telephone calls and automated recorded calls. Live unsolicited marketing calls can be made unless the number has opted-out. Companies must therefore consult the Telephone Preferences Service, the central opt-out register, and must not call any number where the person has otherwise objected to receiving their calls. Further, organisations must always say who is calling, and provide a contact address or freephone contact number if asked.

Automated pre-recorded marketing calls require specific, prior opt-in consent. Consent to receive live calls is not sufficient as a consent to receive recorded calls. Automated calls must say who is calling and provide a contact address or freephone number.

The sending of e-mail or SMS text message marketing requires prior opt-in consent. A limited exception, known as the “soft opt-in” allows an organisation to send an unsolicited e-mail or SMS text message marketing communication if: (i) the organisation obtained the recipient’s contact details in the course of a sale or negotiations for the sale of a product or service; (ii) the marketing communication relates to similar products and services; and (iii) the recipient is given a simple means of refusing receiving further marketing communications (e.g., an “unsubscribe” link or replying “STOP” to an SMS text message).

7.2 Is the relevant data protection authority(ies) active in enforcement of breaches of marketing restrictions?

Yes. The ICO encourages members of the public to report nuisance and unwanted marketing. Recent enforcement actions include a monetary penalty notice of £50,000 issued against Tameside Enegery Services Ltd in July 2013 for making unsolicited live marketing calls, and in November 2012, monetary penalties totalling £440,000 (overruled on appeal) issued against two individuals who owned a marketing company that sent millions of unlawful SMS text messages.

7.3 What are the maximum penalties for sending marketing communications in breach of applicable restrictions?

The maximum penalty is £500,000.

7.4 What types of cookies require explicit opt-in consent, as mandated by law or binding guidance issued by the relevant data protection authority(ies)?

Cookies and similar technologies require notice and prior opt-in consent, except where the cookie is strictly necessary for the transmission of a communication over an electronic communications network or for a service requested by the user. The “strictly necessary” exemption is narrowly interpreted and only covers a limited number of cookies.

The law does not stipulate different types of consent for different types of cookies. In practice, however, the ICO distinguishes between more and less intrusive cookies, and is more focused on the compliance of intrusive cookies such as tracking and advertising cookies, and is less focussed on analytic and functional cookies.

7.5 For what types of cookies is implied consent acceptable, under relevant national legislation or binding guidance issued by the relevant data protection authority(ies)?

Consent for cookies can be implied, where sufficiently informed.

7.6 To date, has the relevant data protection authority(ies) taken any enforcement action in relation to cookies?

The ICO has written to a number of organisations asking them how they comply with the cookie rules, but has not to date taken any enforcement action in relation to cookies.

7.7 What are the maximum penalties for breaches of applicable cookie restrictions?

The maximum penalty is £500,000.

8 Restrictions on International Data Transfers

8.1 Please describe any restrictions on the transfer of personal data abroad.

Transfers of personal data from the UK to outside of the EEA are generally prohibited, unless an adequate level of data protection is assured or a relevant derogation applies. A “transfer” includes the ability to access data from outside of the UK, e.g., viewing it on a computer screen from another country.

8.2 Please describe the mechanisms companies typically utilise to transfer personal data abroad in compliance with applicable transfer restrictions.

Adequacy can be established on the basis of: (i) a European Commission adequacy finding in respect of that country or otherwise covering that transfer (including the US-EU Safe Harbor framework); (ii) the exporting organisation making its own adequacy assessment; or (iii) the data exporter adducing adequate safeguards, including the use of Commission-approved standard contractual clauses or binding corporate rules (“BCRs”).

Where an adequate level of data protection is not assured, personal data may only be transferred where a relevant derogation applies, including the unambiguous consent of the individual and transfers necessary for legal proceedings, to protect the public interest, or to protect the vital interests of the individual.

8.3 Do transfers of personal data abroad require registration/notification or prior approval from the relevant data protection authority(ies)? Describe which mechanisms require approval or notification, what those steps involve, and how long they take.

Transfers of personal data must be included in the exporting organisation’s general registration with the ICO, but do not require prior approval.

9 Whistle-blower Hotlines

9.1 What is the permitted scope of corporate whistle-blower hotlines under applicable law or binding guidance issued by the relevant data protection authority(ies)? (E.g., restrictions on the scope of issues that may be reported, the persons who may submit a report, the persons whom a report may concern.)

There is no specific statute or guidance on hotlines restricting the scope of hotlines. However, hotlines must generally comply with the requirements of the DPA. The Article 29 Working Party opinion on hotlines has application as non-binding general guidance only.

9.2 Is anonymous reporting strictly prohibited, or strongly discouraged, under applicable law or binding guidance issued by the relevant data protection authority(ies)? If so, how do companies typically address this issue?

As there is no specific statute or guidance, anonymous reporting is not strictly prohibited or strongly discouraged under binding guidance. However, it is strongly discouraged under the Article 29 Working Party opinion.

9.3 Do corporate whistle-blower hotlines require separate registration/notification or prior approval from the relevant data protection authority(ies)? Please explain the process, how long it typically takes, and any available exemptions.

Hotlines do not require separate registration or prior authorisation. However, organisations can choose to include their hotline in their ICO registration.

10 CCTV and Employee Monitoring

10.1 Does the use of CCTV require separate registration/notification or prior approval from the relevant data protection authority(ies)?

Use of CCTV does not require prior authorisation or separate registration, but must be specifically mentioned in the general registration.

10.2 What types of employee monitoring are permitted (if any), and in what circumstances?

Employee monitoring is subject to the general requirements of the DPA. Additionally, the Regulation of Investigatory Powers Act 2000 (“RIPA”) and the Telecommunications (Lawful Business Practice) (Interception of Communications) Regulations 2000 (“LBP Regulations”) apply where data are accessed or reviewed in the course of transmission. RIPA has the potential to cover the interception by an employer of an employee’s use of email, text messaging, instant messaging telephone and the Internet. It is generally an offence to intercept any communication without consent. Under the LBP Regulations, interception may be authorised in the following circumstances: (i) monitoring business communications to ascertain whether business standards are being complied with and establishing the existence of facts; (ii) national security; (iii) preventing or detecting crime; (iv) detecting unauthorised use; or (v) ensuring the effective operation of the system. The broad grounds for lawful interception without consent provided in the LBP Regulations are restricted by the requirement that the interception must be effected solely for the purposes of monitoring of communications that are relevant to the business, i.e., the LBP Regulations do not cover the interception of any personal communications of employees.

10.3 Is consent or notice required? Describe how employers typically obtain consent or provide notice.

Accessing and reviewing an employee’s communications, files, work laptops, etc., is generally prohibited unless the consent of the employee is obtained. Employee monitoring can be conducted in limited circumstances without consent if there are appropriate policies and procedures in place notifying employees that accessing, monitoring or reviewing may take place. Such notice may be provided by means of a separate monitoring/electronic communications policy or included in an employee handbook, and should clearly define the nature and extent of potential monitoring. Under Section 29 of the DPA, personal data processed for the prevention or detection of crime are exempt from the requirement to give notice of the monitoring and the requirement to provide individuals with access to personal data. Devices owned personally by an employee may only be seized by an employer if the prior consent of the owner has been obtained, or a court order allowing the employer to carry out such seizure has been obtained.

10.4 To what extent do works councils/trade unions/employee representatives need to be notified or consulted?

Only to the extent required under the terms of any trade union agreement in place.

10.5 Does employee monitoring require separate registration/notification or prior approval from the relevant data protection authority(ies)?

No it does not.

11 Processing Data in the Cloud

11.1 Is it permitted to process personal data in the cloud? If so, what specific due diligence must be performed, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

Processing personal data in the cloud is permitted. The ICO published cloud computing guidance in September 2012 which emphasises that the general requirements of the DPA equally apply in the context of cloud processing. The guidance prompts data controllers using cloud services to consider whether such use could result in processing additional personal data, e.g., usage statistics and transaction history metadata. The guidance specifically advises data controllers using cloud services to: create a clear record of the categories of personal data in the cloud; select an appropriate cloud provider, particularly in terms of confidentiality and integrity of the data; and be wary of “take it or leave it” standard terms, which may not be fully compliant with the requirements of the DPA.

11.2 What specific contractual obligations must be imposed on a processor providing cloud-based services, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

There are no specific terms that must be imposed on cloud providers, in addition to the general contractual obligations (of data security and use limitation).

12 Big Data and Analytics

12.1 Is the utilisation of big data and analytics permitted? If so, what due diligence is required, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

Big data and analytics are permitted. Where data are anonymous, the DPA does not apply. The ICO issued a binding code of practice on anonymisation in November 2012. Under the code of practice, data are considered to be anonymous and no longer personal data where the data: (i) could not be re-identified by a reasonably competent third party having access to resources and using other available information; and (ii) are essentially “put beyond use” by the data controller itself and will not be later re-identified by the data controller.

13 Data Security and Data Breach

13.1 What data security standards (e.g., encryption) are required, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

The DPA requires data controllers to put in place appropriate technical and organisational measures against unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data. The level of security

must be appropriate given the nature of the data (i.e., a higher level of security for sensitive personal data) and the potential risk of harm to data subjects if the security safeguards were breached. Specific standards are not stipulated by law or binding guidance, however, the ICO expects organisations to have internal controls, including: appropriate policies and procedures; access controls; training and awareness; and technical controls, including: password-protected devices; use of encryption technologies; and secure disposal of IT assets.

13.2 Is there a legal requirement to report data breaches to the relevant data protection authority(ies)? If so, describe what details must be reported, to whom, and within what timeframe. If no legal requirement exists, describe under what circumstances the relevant data protection authority(ies) expects voluntary breach reporting.

There is no general legal requirement to report data breaches under the DPA, however, the ICO expects data controllers to report significant breaches to its office.

PECR contains breach reporting requirements that apply specifically to providers of public electronic communication services (e.g., Internet service providers and telecom providers), under which they must report breaches to the ICO within 24 hours of becoming aware of the breach.

13.3 Is there a legal requirement to report data breaches to individuals? If so, describe what details must be reported, to whom, and within what timeframe. If no legal requirement exists, describe under what circumstances the relevant data protection authority(ies) expects voluntary breach reporting.

There is no general legal requirement to notify affected data subjects of data breaches under the DPA, however, the ICO expects data controllers to report significant breaches to affected data subjects, in particular where there is a risk of harm and there are steps the data subjects could take to mitigate the potential harm.

14 Enforcement and Sanctions

14.1 Describe the enforcement powers of the data protection authority(ies):

Investigatory Power	Civil/Administrative Sanction	Criminal Sanction
Monetary penalty notices	Up to £500,000 for serious breaches of the DPA and PECR.	This is not applicable.
Undertakings	While the ICO has no formal powers of undertakings under the DPA, in practice the ICO requests organisations to give undertakings, committing to a particular course of action in order to improve their compliance with the DPA.	This is not applicable.
Enforcement notices	The ICO can issue enforcement notices and “stop now” orders for breaches of the DPA, requiring organisations to take specified steps in order to ensure they comply with the law.	This is not applicable.

Investigatory Power	Civil/Administrative Sanction	Criminal Sanction
Prosecution	This is not applicable.	The ICO liaises with the Crown Prosecution Service to bring criminal prosecutions against organisations and individuals for breaches of the DPA.

14.2 Describe the data protection authority's approach to exercising those powers, with examples of recent cases.

The ICO is regarded as a pragmatic rather than punitive regulator and sees its role as educating organisations and the public on the DPA and other relevant legislation, as well as enforcing it. Nevertheless, the ICO will take action to ensure organisations meet their data protection obligations, including monetary penalties, enforcement notices, and prosecutions.

Examples of recent enforcement action brought by the ICO include:

Failure to register: in October 2013, a pay day loans company based in London and its director were prosecuted by the ICO for failure to register as a data controller. Both the sole director and the company were convicted, fined and ordered to pay a victims' surcharge.

Serious data security breach: in January 2013, the ICO issued Sony Computer Entertainment Europe Limited with a monetary penalty of £250,000 in relation to a serious hacking incident. The hack affected the personal data of millions of customers.

Persistent errors in use of personal data: in November 2012, Prudential Assurance Company was issued with a monetary penalty of £50,000 for repeatedly confusing two customers' accounts with the same name.

Unlawful spamming: in November 2012, monetary penalties amounting to £440,000 (overruled on appeal) were served on two individuals who owned a marketing company which had sent millions of unlawful spam texts to the public over a three year period.

Highest fine imposed to date: in June 2012, Brighton and Sussex University Hospitals NHS Trust were served with a monetary penalty of £325,000 following the discovery of highly sensitive personal data belonging to tens of thousands of patients and staff on hard drives sold on an Internet auction site.

15 E-discovery / Disclosure to Foreign Law Enforcement Agencies

15.1 How do companies within the UK respond to foreign e-discovery requests, or requests for disclosure from foreign law enforcement agencies?

The disclosure of personal data and the transfer of personal data are both processing activities requiring notice and a valid legal basis. Companies typically provide a general notice at the time of collection, e.g., stating in their privacy policies that the collected personal data may be disclosed in relation to legal proceedings or in response to law enforcement access requests. For non-sensitive personal data, UK companies typically rely on the legitimate interest basis to disclose the data. For sensitive personal data, UK companies typically try to obtain the consent of the affected data subjects.

15.2 What guidance has the data protection authority(ies) issued?

The ICO has not issued specific guidance on this issue.

Bridget Treacy

Hunton & Williams
30 St Mary Axe
London, EC3A 8EP
United Kingdom

Tel: +44 207 220 5700
Fax: +44 207 220 5772
Email: btreacy@hunton.com

Naomi McBride is an associate in the Privacy and Cybersecurity team. She advises multinational clients across a broad range of industry sectors on all aspects of European and UK data protection law, including employee monitoring, e-discovery, cookies, the rights of data subjects, online profiling, encryption, cloud computing, location-based services, and the use of audio recording and CCTV systems. Naomi has previous in-house experience at a leading global pharmaceutical company.

Hunton & Williams' Global Privacy and Cybersecurity practice is a leader in its field. It has been ranked by Computerworld magazine for four consecutive years as the top law firm globally for privacy and data security. Chambers and Partners ranks Hunton & Williams the top privacy and data security practice in its Chambers & Partners UK, Chambers Global and Chambers USA guides.

The team of more than 25 privacy professionals, spanning three continents and five offices, is led by Lisa Sotto, who was named among The National Law Journal's "100 Most Influential Lawyers". With lawyers qualified in six jurisdictions, the team includes internationally-recognised partners Bridget Treacy and Wim Nauwelaerts, former FBI cybersecurity counsel Paul Tiao, and former UK Information Commissioner Richard Thomas.

In addition, the firm's Centre for Information Policy Leadership, led by Bojana Bellamy, collaborates with industry leaders, consumer organisations and government agencies to develop innovative and pragmatic approaches to privacy and information security.
